Subgroup analysis

Stratum	Call events	Call n	Call %	No-call events	No-call n	No-call %	p
High	32	120	26.7	59	198	29.8	NS
Lower	28	292	9.6	35	240	14.6	NS

- Green = good, red = bad
- No significant difference in either stratum, so calls had no effect in subgroups
- However the overall analysis was significant
- See table for further details
